

to whom it may concern.....

I respectfully request that you reject the National Association of Broadcasters petition 04-160 concerning XM satellite radio and it's traffic and weather channels. I live in the very large metropolis of Los Angeles. The traffic here is horrendous on any given day! Before I started receiving XM satellite radio, I would have to wait for traffic reports...either every 7 minutes or on the 2's. Well sometimes the traffic patterns in Los ANgeles dont abide by these radio rules. The traffic reports on XM are always on...you dont have to wait. And to me, this is very important when you need to make a very fast decision about which travel path you are taking. % minutes might land you in a "cig alert"
